Prices for borehole drilling up 35% as demand rises

Amidst a severe drought in Zambia, the demand for boreholes has surged, offering opportunities for businesses while presenting challenges for water solution providers.

Speaking in an exclusive interview with Zambian Business Times (ZBT), Dalitso Sakala, the CEO of Dalimable Water Solutions, highlighted the increasing requests for boreholes, especially from farmers grappling...

Gold reserves reach \$168 million

The Bank of Zambia Governor Dr. Denny Kalyalya revealed that the Central Bank had purchased gold amounting to US\$10.6 million in the first quarter of 2024 bringing the total value of gold acquired locally by the Bank of Zambia to US\$168.1 million since the initiative began...

LCC pocketing over K1.5 billion from Bus stations

A source at Lusaka City Council has exclusively disclosed to the Zambian Business Times - ZBT, that the Local Authority is currently collecting over K131 million kwacha per month from the 4 bus stations located in the central business district

This means on average the Local authority is collecting about K1.5 billion annually from only about 4 bus stations in Lusaka.

Speaking in an exclusive interviewwith the Zambian Business Times, a source within the Lusaka City Council revealed that the council collects about K800,000 from each of the top 3 bus stations in Lusaka...

INFLATION SOARS TO 15%

Zambia is currently facing a major economic crisis as inflation rates continue to soar, causing financial strain on families and businesses.

According to the latest statistics obtained by the Zambian Business Times, Annual inflation for May 2024 increased to 14.7 percent from 13.8 percent recorded in April 2024. This means that on average, prices of goods and services increased by 14.7 percent between May 2023 and May 2024. This development was mainly attributed...

90% Progress in debt restructuring fails to boost Kwacha value - Expert

Economist Bright Chizonde has raised concerns about the impact of the recent 90 percent debt restructuring progress on the performance of the Zambian Kwacha. Despite the Minister of Finance and National Planning Situmbeko Musokotwane's announcement that 90 percent of bondholders have consented to the restructuring of the country's US\$3.5 Billion Debt, Chizonde emphasized... ...PAGE 8

Q1 cement production up 20%

Zambia's cement production has increased in the 1st quarter of the Year 2024 by about 20% which is important for the country's economy, as the construction industry is a major contributor to the growth of any economy.

According to the Industrial Minerals production report obtained by the Zambian Business Times - ZBT, cement production increased in the Q1 of 2024 to 615, 598 metric tons from about 513, 610 metric tons produced in 2023 Q1.

This represents about 101, 900 metric tons increase, about 20 percent...

NUMAW President appeals for Chambeshi Metals reopening

The National Union of Miners and Allied Workers (NUMAW), President Saul Simujika, has called upon the government to take urgent action in resolving the challenges surrounding Chambeshi metals, a key player in cement manufacturing.

Zambia is a key Cement and Lime producer which needs to source for gypsum. In the current state of affairs, cement companies resort to importing gypsum components, which could impact final costs by about 10 to 20% depending on the prevailing exchange rates and cost of transportation...

EXPLANATORY NOTES TO THE BANK OF ZAMBIA FOREIGN EXCHANGE MARKET GUIDELINES

1.0 INTRODUCTION

These explanatory notes have been produced to clarify the clauses contained in the Bank of Zambia Foreign Exchange Market Guidelines (hereafter "the Guidelines") that were issued and gazetted on 24th May 2024 under Gazette Notice No. 525 of 2024. The Guidelines are aimed at enhancing transparency, efficiency, and effectiveness of the domestic foreign exchange market in Zambia. They are issued in exercise of the powers contained in Section 50 of the Bank of Zambia Act, 2022.

2.0 INTERPRETATION

This section provides important definitions related to the implementation of the Guidelines.

3.0 APPLICATION

These guidelines apply to persons undertaking transactions in the foreign exchange market.

This means that everyone engaged in the buying and selling of foreign exchange must abide by these regulations, without exception.

4.0 TRANSACTONS IN FOREIGN EXCHANGE MARKET

Clause (4)(1) A person conducting transactions in the foreign exchange market shall abide by the following provisions:

(a) The buying or selling of foreign currency is prohibited unless one of the parties to the transaction is an Authorised Dealer.

This clause means that when an individual or corporate entity intends to buy or sell foreign exchange, they must engage a commercial bank, bureau or any other financial institution licenced by the Bank of Zambia to carry out foreign exchange operations. This applies to all transactions involving the buying and selling of foreign currency in Zambia.

(b) For a person resident or registered to operate in Zambia, the trading of Kwacha for foreign currency shall only be done with an Authorised Dealer.

This means that any person resident in Zambia or any corporate entity registered to operate in Zambia shall only transact (that is, buy or sell) Kwacha with a local commercial bank, bureau or any other financial institution licenced by the Bank of Zambia to carry out foreign exchange operations. In other words, the buying or selling of foreign exchange against the kwacha by any person resident in Zambia or any corporate entity registered to operate in Zambia is only allowed when conducted with a local commercial bank, bureau or any other financial institution licenced by the Bank of Zambia to carry out foreign exchange operations.

(c) A person buying or selling foreign currency for Kwacha in quantities up to the prescribed negotiable amount shall transact at rates displayed on the Authorised Dealers' Board rates. Amounts above the negotiable amount may be transacted at negotiable rates.

This means that any person or corporate entity that wishes to buy or sell foreign currency shall deal at the displayed board rates for amounts less than the prescribed negotiable amount. Any amounts above this threshold may be negotiated. For example, if the prescribed negotiable

amount is US\$1,000,000, this means that the person or corporate entity trading below US\$1,000,000 cannot engage in any negotiation for a price but will only use the board rates as displayed by the financial institution that one is dealing with. However, if the amount is equal to or exceeds the prescribed negotiable amount (in this example, US\$1,000,000), the person or corporate entity can negotiate for a price.

Clause (4)(2) A person who contravenes this part commits an offence and is liable, on conviction, to a fine not exceeding two thousand five hundred penalty units or to imprisonment for a term not exceeding two years, or to both.

Clause (4)(3) The Bank may impose an administrative penalty on a person for failure to comply with a provision of these Guidelines as prescribed.

These clauses mean that any person or corporate entity that violates these guidelines is liable, on conviction, to a monetary fine or imprisonment or both. Administrative penalties may also be applied in instances of non-compliance.

5.0 FURNISHING OF INFORMATION

Clause (5) The Bank of Zambia may require a person to provide it with information relating to that person's transactions in the foreign exchange market.

This means that the Bank of Zambia may contact a person or institution to obtain information related to their transactions in the foreign exchange market in order to promote compliance with the law.

These Guidelines are with effect from 24 May 2024.
